

Mustafa Adnan Ahmed

FRONT-END DEVELOPER

A skilled front-end developer specializing in the React framework, proficient in crafting responsive and intuitive user interfaces for web applications. With expertise in HTML, CSS, Bootstrap, JavaScript, and React js , I transform design concepts into functional components that prioritize seamless user interactions and optimal performance. My role involves effective state management, integration of advanced features, and close collaboration with multidisciplinary teams to deliver cohesive solutions

WORK EXPERIENCE

Front-end development projects

A) Memory Block Game :

In this simple memory matching game, players can select two cards from a set of face-down cards. If the two chosen cards match, they remain revealed. The objective is to successfully reveal all cards by matching them in pairs. However, players have a limited number of attempts to make incorrect selections before losing the game and having to restart. Each time the game starts, the cards are shuffled into a random order, ensuring a new challenge with every game.

B) Tic Tac Toe Game :

This is a straightforward game of tic-tac-toe played between two players, featuring a restart button available at any point during the game. The game declares the winner after each round and keeps track of the score for both players. It provides a user-friendly interface where players can easily restart the game at their convenience, ensuring a seamless and enjoyable gaming experience.

C) Hangman Game :

A classic word-guessing game where one player thinks of a word and the other player tries to guess it letter by letter. The word is represented by blank spaces, and the guesser suggests letters they think might be in the word. Correct guesses reveal the letter's positions, while incorrect guesses result in drawing parts of a hangman's figure. The game continues until the guesser guesses the word correctly or completes the hangman, losing the game

EDUCATION

Fayoum University —

Bachelor of Communication

Engineering

2017- 2022

- Overall Grade (good)
- final project about IOT smart home automation with mobile application and web application.
- Project grade (excellent)

SKILLS

- HTML
- CSS
- SASS
- BOOTSTRAP
- JAVASCRIPT
- Git & Github
- Api Integration (Recoil – Axios)
- REACT JS

PERSONAL SKILLS

- Problem-Solving
- Teamwork
- Time Management
- Fast Learner
- Good Speaker
- Creativity

LANGUAGES

Arabic: Mother tongue.

English: Well written and spoken.
